

AMENDMENTS TO THE SPECIFICATION

After paragraph [0003] on page 1 of the specification, please insert the following:

BRIEF DESCRIPTION OF THE DRAWING

β' The drawing shows a flow diagram of the method of the present invention.

After paragraph [0037] on page 8 of the specification, please insert the following new paragraph [0038]:

β^2 [0038] With reference now to the drawing, the method of the present invention will be summarized. The method acquires information from at least one database managed by a computer with a search engine. In step 10 of the method, an information request from a user terminal is established.

Proceeding to step 12, location data is determined, wherein the location data defines the location of the user terminal based on the identity or the location of a transmitting station of the communication network. In step 14, the information request is transmitted to the computer together with location data defining the location of the user terminal. In step 16, the location data and the location attributes are correlated for selecting and/or organizing the information.
